

To Whom It May Concern

Mr Roland Verreet / Conference Speaker

I am pleased to be able to provide this endorsement for Mr Roland Verreet, who spoke at the CICA Conference in Hobart (Tasmania, Australia), held 11-13 September 2013.

Roland came highly recommended to CICA as an international renowned speaker and independent consultant – one of the world's best. The CICA Board, Members, international guests and Conference delegates were not disappointed.

Roland demonstrated a masterful command of steel wire rope knowledge, reflecting his 37 years in the industry. In addition to his great technical knowledge Roland has an impressive speaking style, great content and presentation quality which engages, impresses and captivates an audience.

Roland did two presentations for the CICA Conference. The first session was for 30 minutes as part of the main speaker program. The second session was an early morning breakfast workshop on the next day (held nearby the main speakers' room) which was planned to run for 90 minutes. It was so successful many delegates stayed on for several hours as Roland went through as much technical information as delegates wanted to "soak-up".

In summary, Roland was a "real winner" for the CICA 2013 Conference and this was reinforced by the delegate survey feedback with Roland ranked highest as our best speaker. I'm sure our delegates will remember a great Hobart location and how special the 2013 Conference was ... and five months later delegates are still talking about Roland's session!!

Please contact me if you would like to confirm any comments or details.

Yours Sincerely
